Retailers of electrical and electronic equipment (EEE) will be affected by new regulations, which were made on 5<sup>th</sup> July 2005 transposing EU legislation on waste electrical and electronic equipment (WEEE). While the WEEE Directive is based largely on the principle of **producer responsibility**, the regulations include specific provisions relating to retailers.

The regulations and other information on WEEE can be accessed on the Department's website by clicking on the following link:

[www.environ.ie/DOEI/DOEIPol.nsf/wvNavView/Waste+Electrical+&+Electronic+Equipment?OpenDocument&Lang=](http://www.environ.ie/DOEI/DOEIPol.nsf/wvNavView/Waste+Electrical+&+Electronic+Equipment?OpenDocument&Lang=)

#### Retailer Obligations

From **13 August 2005**, each retailer must:

- » be registered with their local authority;
- » provide for free in-store take back of household WEEE on a one-for-one basis on the sale of a new like product;
- » ensure that any WEEE collected is delivered to an approved collection facility;
- » ensure that the storage and transport of WEEE collected as above meets the requirements of the Regulations; and
- » ensure that private households are informed of the WEEE take back facilities available to them and that they are encouraged to participate in the separate collection of WEEE.

Additional details, including simple ways to ensure you are meeting your obligations are provided below.

## Local Authority Registration

The first step in ensuring you are meeting your obligations is to **register** with your local authority i.e. County or City Council. The registration system will be simple and straightforward. Retailers will be required to complete and sign a simple form undertaking to comply with **General Binding Rules**\* on the environmentally sound management of WEEE and to forward this with a nominal fee (€20) to their local authority. The initial registration will cover a period of 16 months, with registration taking place annually from January 1<sup>st</sup> thereafter.

\* Further information on registration and **General Binding Rules** below...

## Retailer Take-back

From 13 August 2005, retailers will be required to take back WEEE from members of the public **free of charge**. Take back will be on a one-for-one basis only and the WEEE must be of a **similar type** or have performed the **same function** as the new item purchased. For example, you are not obligated to accept a microwave if your customer has purchased a toaster. Retailers cannot offer inducements in lieu of their take-back obligations.

### Alternatives to In-store Take Back

Subject to the prior agreement of the local authority, retailers may make alternative arrangements to fulfil the one-for-one obligation. Any such arrangements must not be more inconvenient for the purchaser and, as with in-store take back, it must remain free of charge. Potential customers must be made aware of such requirements. See appendix 1 for a sample of the signage required. It is not acceptable for a retailer to indicate that WEEE may be deposited at a local authority civic amenity facility as an alternative to in-store take back.

If an item of WEEE has not been exchanged at the time of sale of a new product, retailers must inform the purchaser in writing of the deadline by which WEEE must be returned to avail of the free one-for-one take back. WEEE must be returned within a maximum of 15 days of the date of sale or, if delivered, within a maximum of 30 days of the date of delivery. If an alternative arrangement has been agreed with the local authority, purchasers must be informed of the alternative collection facility.

## Delivery to Approved Collection Facilities

Retailers will be entitled to dispose of household WEEE that has been exchanged for purchase of a new item free of charge at civic amenity sites. Please note that this applies only to household WEEE taken back free of charge from 13 August 2005 onwards. It is important to note that this is **subject to prior arrangements** being made with the relevant local authority and/or site owner/operators; a local authority may divert the WEEE to another facility operated by it or on its behalf.

### Arrangements with Civic Amenity Sites

Civic amenity sites often have peak times when they are particularly busy, e.g., weekends. In addition, some sites such as those located in urban areas have restricted access and/or limited capacity.

It is important for site operators to know how many retailers they can expect at their sites. It is equally important for retailers to accommodate any specific requirements, such as limiting the number of items per trip, the number of trips per week or the times when retailers will have access to the site.

This is in everyone's best interest, including the public who also rely on these sites to recycle their waste. One retailer at a time may not present a problem, ten certainly could!

### *Alternatives to delivering it yourself*

You may be able to make arrangements to have WEEE collected from your premises by the producers (or collective compliance schemes acting on their behalf) who are responsible for the WEEE. Appropriate waste authorisations will be required for those who undertake the collection e.g., a Waste Collection Permit.

Local authorities have been encouraged to consult with all relevant stakeholders in advance of any plans or proposals in this regard being put in place. Retailers are advised to do the same and in particular to consult with other retailers and/or representative organisations.

*The development of local arrangements between local authorities, retailers and producers (e.g., through collective schemes) could relieve some of the potential pressure on civic amenity sites. For example, retailers could divert WEEE direct to permitted waste collectors or recycling facilities, rather than taking it to civic amenity sites...*

Two **collective compliance schemes** are currently in operation. Contact details for each of the schemes are provided at the end of this document.

## **Special Requirements for Storage and Transport of WEEE**

Because WEEE is a waste, there are certain minimum requirements associated with how it is collected, stored and disposed. The WEEE regulations allow retailers to avail of an exemption from the normal waste permitting requirements for the storage and transport of WEEE; however, **a modified permitting regime will operate to ensure certain minimum requirements are met**. Under the modified regime which will be less burdensome than the normal waste permitting requirements, retailers will be required to **register** their premises with their local authority i.e. County or City Council.

### *Storage*

WEEE taken back at retailers' premises needs to be stored and handled properly. All sites for the storage of WEEE must have **impermeable surfaces**. If the WEEE is to be stored in an outdoor area, this must have **weatherproof covering**. **Spillage collection facilities** must also be provided.

Registered retailers who store WEEE that has been taken back free of charge at their premises are exempted from requiring a Waste Permit, provided that the quantities in storage at any one time do not exceed the following:

- » **90** cubic metres of household WEEE other than WEEE listed in category 5 of the *First Schedule* (e.g. lighting equipment) and mobile phones,
- » **2,000** units WEEE listed in category 5 of the *First Schedule* (e.g. lighting equipment), and/or
- » **50** kgs of mobile phones.

This exemption will not apply where the WEEE is contaminated, and therefore a health and safety risk, or where storage does not meet the requirements noted above.

### **Transport**

Retailers **who are registered** with their local authority and who have accepted WEEE back on a one-for-one basis are exempted from requiring a Waste Collection Permit when transporting that WEEE to an approved collection or recovery facility, provided that the vehicle used for its transport is registered in the State. The exemption will only apply where the WEEE concerned was taken back free of charge on a one-for-one basis from 13 August 2005, and will eventually be treated in accordance with relevant provisions of the Regulations.

## Collection

WEEE taken back at retailers' premises should only be passed on to someone authorised to collect and manage this type of waste. These include:

- » A civic amenity facility, provided any necessary arrangements have been made with the relevant local authority in advance (e.g., days and times WEEE will be accepted from registered retailers);
- » Permitted waste collector acting on behalf of the producer(s) responsible for the WEEE or an approved collective compliance scheme;
- » Charities which are registered with the Revenue Commissioners;
- » Members of the public, provided that the equipment will be reused for the purpose for which it was originally designed

### Retailer Registration – General Binding Rules

Most sites used for the storage of waste require a Waste Permit from the relevant Local Authority. Retailers can avail of an exemption to this, provided they register with their Local Authority.

A simple, universal registration form for the storage of WEEE by retailers is being developed and will be sent out to you shortly. The form will request information regarding the types of WEEE you intend to store and will ask you to sign a declaration stating you comply with the special requirements for the storage and treatment of WEEE, outlined above.

All sites used for the storage of waste are subject to periodic inspection by the relevant authority.

## Environmental Management Costs (EMC's)

Most WEEE arisings in the short term will be historic waste (i.e. arising from EEE placed on the market before 13 August 2005). The Regulations allow producers to show EMC's on new products placed on the market for a limited period of time – **8 yrs** for the various categories of historic WEEE and **10 yrs** in the case of category 1 (i.e. large household appliances). Costs where EMC's are shown may not exceed the actual costs of collection, treatment and disposal in an environmentally sound manner of historic WEEE. Where producers display EMC's, retailers must also display them to customers, subject to the following conditions –

- » Where prices of items are displayed in-store (e.g. shelf ticketing), on a website, in a catalogue or in media advertising there must be a "three point" display i.e. Retail price, the EMC and price less the EMC. The retail price must not be less prominent than the price exclusive of the EMC and the EMC;

See Appendix 2 for examples of compliant and non-compliant shelf ticketing.

- » The EMC amounts must also be shown on a notice in-store bearing at least the following wording in addition to details of the relevant environment management costs –

"The prices of these items include contributions to a producer recycling fund to ensure that waste electrical and electronic equipment is collected and recycled in a responsible manner."

See Appendix 3 for examples of compliant and non-compliant signage.

- » Till receipts must display either –
  - the following text: "*Price includes Producer Recycling Fund (PRF) contribution*"; or

- the EMC amount in addition to the “retail price”, the retail price being the amount paid by the consumer.

See Appendix 4 for examples of compliant and non-compliant till receipts.

- » In addition to displaying EMCs at their premises, each retailer must also make available to the purchaser concerned a document which shall state “the price of this item includes a contribution to a producer recycling fund to ensure that waste electrical and electronic equipment is collected and recycled in a responsible manner”,
- » Retailers when quoting the price of a product must quote the price inclusive of the EMC which will be regarded as the retail price,

The current level of EMCs can be obtained from the website of the WEEE Register at [www.weeeregister.ie](http://www.weeeregister.ie)

### Provision of Information

When selling a new product, retailers must inform users of the return and collection systems available to them at the end of that product’s life, when it becomes WEEE. Retailers can meet this obligation by providing the required information in leaflets or in signage at the point of sale. In addition, retailers who, in agreement with the appropriate local authorities, have made alternative arrangements to in store take-back are required to display notices at their premises advising the public that an alternative take back facility has been provided.

### Retailer = Distributor

The WEEE Directive defines a ‘distributor’ as a person that supplies electrical EEE to the person who is going to use it. Retailers are, therefore, distributors for the purposes of the WEEE legislation.

If a retailer (or distributor) sells electrical and electronic products from a ‘producer’ who fails to register with the **WEEE Registration Body**,\* that **retailer/distributor takes on the producer responsibility obligations for that equipment.**

\* Further information on producer **registration** below...

In addition, if a retailer/distributor re-brands or imports equipment directly, they may be considered a producer for the purposes of implementing the Directive in Ireland. **If you or your company re-brand or import equipment directly, you are advised to contact Retail Ireland, the WEEE Register or one of the approved compliance schemes to determine whether you qualify as a producer for the purposes of the Regulations.** Contact details for these are provided at the end of this document.

### How do I know if they are registered?

Registered producers will be issued with **a registration number**. From 13 August 2005, producers will be required to display this number on any invoice, credit note, dispatch or delivery docket they issue. If after 13 August a registration number cannot be provided, you are strongly advised to contact the producer or their representative in Ireland before agreeing or continuing to sell their products. Also, retailers should avoid stocking any EEE from producers that does not contain a crossed out wheeled bin symbol. From 13 August 2005, all EEE being put on the market in the European Union must be marked with a crossed out wheeled bin.

## Frequently Asked Questions

*Q. Will my shop become a mini civic amenity site?*

No. With regard to the taking back of WEEE the Regulations do not go beyond the requirements placed on retailers in the Directive, which is the taking back on a one-for-one basis of WEEE of similar type or fulfilling the same function of the new item that is being purchased. This is also in line with the recommendations made by the WEEE Taskforce. Retailers will be able to transfer WEEE collected in this fashion free of charge to civic amenity sites. They may also, subject to the agreement of the appropriate local authorities, make alternative arrangements to in-store take-back, provided that such arrangements are not more inconvenient for the purchaser and remain free of charge.

*Q. Will I have to take back batteries?*

No. Batteries which are not contained within a piece of electronic equipment are outside the scope of the Directive and retailers will not be required to take them back. Where an item of equipment taken back contains batteries, those batteries should be left in the equipment; any batteries removed by the retailer would then become the responsibility of that retailer.

*Q. Will there be an additional health and safety risk for my staff?*

No. A retailer will not be required to take-back contaminated WEEE that presents a health and safety risk unless such contamination is on account of his or her liability under the Sale of Goods and Supply of Services Act 1980.

*Q. Can I charge a collection fee for taking back WEEE on the delivery of a new product?*

No. One for one take-back is free regardless of whether this happens at your premises or on the delivery of a new product. The retailers right to charge for delivery of the new item of electrical or electronic equipment, however, is not affected.

*Q. Will I need to obtain waste licenses or permits?*

No. In order to minimise the regulatory burden of the WEEE Directive, the Regulations propose that retailers be allowed to avail of an exemption from the normal waste permitting requirements for the storage and transport of WEEE in certain circumstances. Under the modified regime, which will be considerably less burdensome and less expensive than the normal collection and waste permitting requirements, retailers will be required to register their premises with their local authority.

*Q. Will my insurance costs go up?*

Insurance costs should not increase as a result of obligations under the WEEE Directive as there is no change of function here. Retailers are constantly required to take back returned, damaged and faulty goods from consumers as part of their normal day-to-day business operations.

*Q. Will I be at a competitive disadvantage now that other Member States have deferred implementation?*

Deferral of the Directive in any other member state will not place retailers at a competitive disadvantage. The obligations involved for all who sell EEE will be the same, regardless of whether they are independent retailers or multiples, headquartered in or outside the State.

*Q. Will I need to obtain a change of use for my premises under the Planning Regulations?*

No, there are no planning issues here. Retailers are simply continuing an everyday practise of taking back goods from consumers; before the implementation of the WEEE Directive this take-back related to returned, faulty or damaged goods, now it is extended to include WEEE.

*Q. I haven't heard much about this legislation until now, have retailers been consulted throughout?*

In addition to retailer representation on the WEEE Taskforce which has been up and running since February 2003; there have been two public consultations in April 2004 and April 2005. As part of the consultation process, the Minister has also met with retailers' representatives. The Department, in finalising the Regulations, considered all comments and observations received.

## **Relevant Contact Details**

### ***Retail Ireland***

In February 2003, the Government established a Taskforce made up of experts from relevant sectors including electronics manufacturers and retailers, the waste management industry and representatives of relevant Government Departments, local authorities and the Environmental Protection Agency (EPA). Retailer representation was via Retail Ireland.

### ***Collective Compliance Schemes***

To date two collective compliance schemes have been approved. They are WEEE Ireland and the European Recycling Platform. Their contact details are as follows:

#### **WEEE Ireland**

Suite 18, The Mall,  
Beacon Court,  
Sandyford,  
Dublin 18

Phone: 00 353 1 299 9320  
[info@weeeireland.ie](mailto:info@weeeireland.ie)

Web: [www.weeeireland.ie](http://www.weeeireland.ie)

#### **European Recycling Platform**

Liffey Park Technology Campus,  
Barnhall Road,  
Leixlip,  
Co. Kildare

Phone: 00 353 1 839 6077E-mail:  
E-mail: [ireland@erp-recycling.org](mailto:ireland@erp-recycling.org)

Web: [www.erp-recycling.org](http://www.erp-recycling.org)

The registration of producers and the validation of EMCs is undertaken by the WEEE Register. Its contact details is as follows:

The WEEE Register Society Limited.  
The National WEEE Registration Body.  
Suite 501,  
8 Dawson Street,  
Dublin 2.

Phone: 00 353 1 240 9320  
00 353 1 240 9321  
Fax: 00 353 1 240 9342  
E-mail: [info@weeeregister.ie](mailto:info@weeeregister.ie)  
Web: [www.weeeregister.ie](http://www.weeeregister.ie)

Further information, including the regulations and accompanying explanatory memoranda can be obtained at the Department's website: [www.environ.ie](http://www.environ.ie)

#### **Disclaimer:**

This document does not purport to provide a legal interpretation of the Waste Management (Waste Electrical and Electronic Equipment) Regulations 2005 – S.I. No. 340 of 2005. The Department of the Environment, Heritage and Local Government developed this document as guidance to retailers in fulfilling their obligations. Users of this document should use the material provided therein for information purposes only. The Department of the Environment, Heritage and Local Government does not accept any responsibility whatsoever for loss or damage occasioned or claimed to have been occasioned, in part or in full, as a consequence of any person acting or refraining from acting, as a result of a matter contained in this document.

## **Signage Alternative Take Back Arrangements**

### **WASTE MANAGEMENT ACT 1996**

**[Name of distributor] participates in a scheme operated by [Name of undertaking approved by local authority] which has been approved by [Name of local authority] for the collection of waste electrical and electronic equipment. [Name of undertaking approved by local authority] accepts waste electrical and electronic equipment at [address of premises accepting waste electrical and electronic equipment]. [Name of distributor] is therefore not required to accept waste electrical and electronic equipment on these premises.**

Signage must be at or within one metre of each entrance to the premises, and must be –

- at least 30cm X 40cm or 40cm X 30cm – e.g. approx A3 – **an A4 sign is NOT compliant,**
- printed in black indelible ink with a times new roman font size of at least 32 or equivalent and line space of at least 1.5 lines,
- on a white background,
- of durable material, and
- not be obscured or concealed at any time,

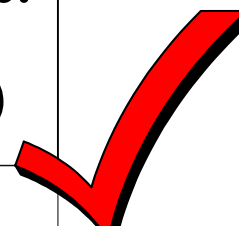

It is not acceptable for a retailer to indicate that WEEE may be deposited at a local authority civic amenity facility as an alternative to in-store take back.

## Display of vEMCs – Point of Sale Signage

The prices of these items include contributions to a producer recycling fund to ensure that waste electrical and electronic equipment is collected and recycled in a responsible manner.

### Large Household Appliances

All side by side/American style refrigeration €30.00

All larger and two door (under/over configuration) appliances and chest freezers above 150 litres €20.00

All under counter/table top refrigeration and chest freezers below 150 litres €10.00

Large Appliances €10.00

Medium Sized Appliances €5.00

Small White Goods €1.00

### Small Household Appliances

Floor Care €2.00

Other Small Household Appliances €1.00

Miscellaneous Small Household Appliances €0.50

Clocks and Watches €0.00

### Consumer Equipment

Large TV's (73cm+) €15.00

Medium Size TV's (52-72cm) €10.00

Small TV's (0-51cm) €5.00

Medium Size Consumer Products €1.00

Small Consumer Products €0.50

Miscellaneous minor items €0.50

### Lighting Equipment

Bulbs (with the exception of filament bulbs) €0.50

Lighting Equipment (with the exception of household luminaries) €0.50

### Electrical & Electronic Tools

All Electrical & Electronic Tools €2.00

Signage must be at or within one metre of the point of sale and must be –

- at least 30cm X 40cm or 40cm X 30cm – e.g. approx A3 – **an A4 sign is NOT compliant**,
- printed in black indelible ink with a times new roman font size of at least 32 or equivalent and line space of at least 1.5 lines,
- on a white background,
